

NAEEL ZURIEK

ELV / ICT PROJECT & DESIGN MANAGER · CONTAINER TERMINAL IT & NETWORK INFRASTRUCTURE

Dubai, UAE · +971 52 284 4000 · eng.naeel.zuriek@gmail.com · naeel.ai-technology.ae · LinkedIn

Project and infrastructure leader with 15+ years delivering ELV, ICT and security programs worth over USD 40M across container terminals, ports, oil & gas, aviation and hospitality. I build the systems terminals run on — terminal operating system networks, crane and yard connectivity, gate automation, reefer monitoring, surveillance and Tier 3/4 data centers — and then keep them running at 99.9% availability. PMP, RCDD, RTPM and CPMAl certified, equally at home in a design review, a bid room and a live yard at 3 a.m.

CONTAINER TERMINAL IT & OT SYSTEMS

TOS & SERVERS	NAVIS N4 connectivity, application and DB server rooms, virtualized hosts, backup and DR replication
CRANE SYSTEMS	STS / RTG networks over fiber reels and 802.11 mesh, PLC and crane-side switch cabinets, DGPS positioning
GATE & YARD	OCR portals, LPR, weighbridges, RFID/RTLS tags, driver kiosks, vehicle-mount and handheld terminals
REEFER & IOT	Reefer monitoring controllers and gateways, environmental and power sensors, alarm escalation to O&M
COMMS	TETRA and VHF ship-to-shore radio, PA/GA, IP telephony, SDH and carrier links, outdoor Wi-Fi and P-to-P backhaul
SECURITY	500+ IP cameras with video analytics, ISPS-grade access control, turnstiles, barriers, biometrics, perimeter intrusion
DATA CENTRE	Tier 3/4 rooms: racks, containment, UPS, PDU, precision cooling, FM200, DCIM and structured cabling to RCDD standard
LIFECYCLE	Installation, configuration, T&C, cutover, spares and preventive maintenance under 24/7 terminal operations

EXPERIENCE

Network and Infrastructure Specialist

MAR 2024 – PRESENT

CMA Terminals Khalifa · Abu Dhabi, UAE

- Own the full IT and ELV estate of a 1M+ TEU container terminal, holding 99.9% availability on the systems that move every box through the gate, yard and quay.
- Installed, configured and now operate the port's operational technology: NAVIS TOS links, DGPS, gate OCR, RTG/STS crane networks, ship-to-shore radio and reefer monitoring — including crane-side cabinets, mesh coverage and vehicle-mount terminals.
- Run the enterprise network end to end: core and edge switching, VLAN and routing design, firewall policy, site-to-cloud VPN, and outdoor wireless spanning the quay, yard and workshops.
- Delivered the terminal's data center from empty room to live service — racks, UPS, cooling, cabling and cutover — coordinating civil, electrical, mechanical and IT contractors on schedule and within budget.
- Delivered security systems including 500+ IP cameras, access control (turnstiles, gates, biometrics) and intrusion detection, integrated with port authority security operations and ISPS reporting.
- Introduced a structured fault-triage and preventive maintenance regime that cut recurring network incidents 30% in six months and shortened mean time to restore.
- Assess edge computing, AI video analytics and surveillance upgrades, extending asset life and trimming CAPEX and OPEX.

ELV / ICT Projects and Design Manager

MAR 2023 – MAR 2024

Abu Dhabi Ports · Abu Dhabi, UAE

- Ran a concurrent portfolio of ELV and ICT projects across port and terminal facilities worth AED 20M+, all delivered inside agreed time, cost and quality gates.
- Wrote scopes of work and BOQs and chaired design reviews for security, networking and structured-cabling packages, cutting procurement cycle time 20%.
- Acted as the single technical authority between contractors, consultants and port authority stakeholders, closing designs against ADMCC and ISPS requirements.
- Standardized terminal ICT design assumptions – cabling routes, node rooms, camera and Wi-Fi coverage – so later packages started from a proven baseline.

ELV / AV / ICT Engineering Manager

JUL 2022 – MAR 2023

Transtel Telecommunication Services · Dubai, UAE

- Led design of complete ICT and ELV solutions for hospitality and commercial developments, engineered to BICSI and TIA standards.
- Qualified and onboarded three vendor partners, taking 15% out of material cost without conceding on specification.
- Authored the technical half of proposals that opened new client accounts and fed the business development pipeline.

Bid & Estimation Manager

MAR 2022 – JUL 2022

e& Enterprise IoT & AI · Dubai, UAE

- Owned technical bids for structured cabling and IoT solutions, lifting win rates through sharper costing and clearer proposal narratives.
- Pulled engineering, procurement and commercial inputs into single coherent submissions under tight tender deadlines.

AV / ELV / ICT Project Manager & Pre-Sales Engineer

DEC 2017 – MAR 2022

Waseela Al Khaleej · Dubai, UAE

- Delivered 20+ AV, ELV and ICT projects across hospitality, commercial and government clients, up to AED 8M each, from design through testing and handover.
- Built and led a 12-strong team of engineers and technicians; weekly progress reviews cut average punch-list items by 40%.
- Won and held key accounts including VISA CEMEA HQ and Millennium Hotel on the strength of pre-sales design work.

Senior Telecommunications Engineer

SEP 2013 – DEC 2017

IVS Technology Services · Dubai, UAE

- Engineered telecom, fiber-optic, Wi-Fi and radio systems for five major oil & gas projects – Al-Zubair, Badra CPF, Majnoon, Sohar Refinery, Lower Fars – worth over USD 10M combined.
- Produced drawings, specifications and BOQs that the company adopted as its standard engineering templates.
- Supported site teams through installation and commissioning in live hazardous-area plants.

Telecommunications Engineer

SEP 2008 – SEP 2013

Homs University · Syria

- Maintained and upgraded campus telecom and networking infrastructure, delivering measurable cost savings on academic systems.
- Taught in the Antenna and Microwave Engineering Laboratory as teaching assistant alongside Master's research.

CORE COMPETENCIES

Container terminal IT & OT operations	Network architecture (LAN/WAN, SDH, TETRA, fiber)
Data center design & operations (Tier 3/4, DR)	Project lifecycle management (PMP, Agile)
ELV integration (CCTV, ACS, FA, BMS, IPTV, GRMS)	Structured cabling to BICSI / RCDD standards
Budgeting, estimation & bid management	Telecom project management (RTPM)
AI/ML project integration (CPMAI)	Stakeholder & vendor coordination
Compliance: SIRA, ADMCC, CSPP, ISPS	Commissioning, cutover & 24/7 O&M

SELECTED PROJECTS

PORTS & LOGISTICS	Khalifa Port CT3 Tier 3 data center · CMA Terminals network O&M · Noon mega warehouse, KIZAD · Etihad Railway terminal
AVIATION	Sharjah Airport expansion — Huawei Tier 3 data center (108 racks)
OIL & GAS	Al-Zubair · Badra CPF · Majnoon · Sohar Refinery · Lower Fars
HOSPITALITY	Millennium Hotel · TH8 Hotel · Al-Fattan Downtown · Multaqa Avenue · VISA CEMEA HQ

CERTIFICATIONS

PMP — Project Management Institute, 2024	RTPM — BICSI, Registered Telecom Project Manager, 2026
CPMAI — PMI, AI in Project Management, 2026	CSPP — Certified Sustainable Project Professional, 2026
RCDD — BICSI, Registered Communications Distribution Designer, 2023	CCNA — Cisco Certified Network Associate, 2017
SIRA & ADMCC — Security Systems Engineer, 2017 / 2024	Vendors: Hikvision, Milestone, Mobotix, Belden, Leviton, Nexans

EDUCATION

B.Sc. Telecommunications & Electronics Engineering

Homs University, Syria · 2003 – 2008

Master's research, Antenna & Microwave Engineering
